+ Description

Our beer is 100% natural, brewed exclusively with local, healthy and non-modified, with no artificial ingredients. Our hops come exclusively from Alsatian hop farms, and our malt-house is located just outside Strasbourg. There is no filtration or pasteurisation, which ensures that the beer keeps all its goodness, such as vitamins and flavour. There are no stabilisers either, so the beers will age like good wine; no flavour enhancers; no clarifiers; no colourings; no injected CO2 (refermentation in bottles); no animal proteins to keep a good head; and we do not put our beer under pressure - if we have to wait months, we shall!
