+ Description

This is a history trail taking you along the fortified line of German defences south of Le Donon during the 1914-1918 war. The site is itself a page of the history of Alsace.

Please note: An area for the protection of wild animals has been set up (marked by signs), so the complete 11-km trail is only open in July and August. Outside this period, only 5 km of the trail are open. Please see the trail description for more details. Thank you for your understanding.
